"Money Corrupts Political Systems. The main technic used now through negative commercials is to destroy the reputation of your opponent"

Atlantic Publicity presented former President, Jimmy Carter on its American Airlines, Delta and US. Airways in-flight interview programs. President Carter was also interviewed today by Pierce Morgan on political points as well as about the Carter Center.

In view of recent world events, the interview is revealing a man who is actively involved in global humanitarian projects that far surpass the effectiveness of his Presidency. President Carter founded The Carter Center in 1982 with his wife Roselyn as a non-governmental, not-for-profit organization. In partnership with Emory University. The Atlanta-based center works to advance human rights and alleviate human suffering on a global scale, and has helped to improve the quality of life for people in more than 70 countries. Honoring his ongoing efforts to bring peace to a troubled world, President Carter was awarded the Nobel Peace Prize in 2002. In today's interview he said, "Peace and Human Rights" is what he would like to see on his tombstone. He also called some of our current politics stupid, which is a brutal truth and reality. I am hopeful that it is recognized by more and more people as we experience more and more complete nonsense and idiotism. Maybe America needed a wake up call to understand how good we had it before!
